DETAILED ACTION

Election/Restrictions

Applicant's election of Group I (claims 1-11) and species of bioabsorbable materials and bullet nose shape in the reply filed on April 3rd, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Although applicant did not specify the claims that were readable upon the elected species, the claims are very clear to what species they are directed. Claims 1-3, 5, and 7-9 are readable upon the elected species. Claims 4, 6, and 10-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention or species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 3rd 2006.

Drawings

The drawings are objected to because they fail to meet the formal requirements as evidenced by the attached Draftsperson's Drawing Review Sheet. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and

where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5, and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee et al (US Patent 5,480,403).

Lee et al disclose a bioabsorbable copolymer of glycolide or lactide (Column 4, Lines 22-29) implantable cross-pin (**Figures 15-18**) comprising: an elongated member (**312**); a bullet-shaped nose member (**311**); an axial trough (**315**) in the elongated member extending from the proximal end (**314**) to a distal end (**316**) having an open top; an opening (**313**) at the distal end of the nose member (**311**) concentric with the longitudinal axis of the elongated member (**312**) and in communication with the trough (**315**).
